

Aurea Messenger for Plug-and-Play ESB

Aurea Messenger lets your technology keep pace with your business. Aurea's industry leading Enterprise Service Bus (ESB) lets you adapt and change your infrastructure with plug-and-play speed and ease.

Evolve your infrastructure at the pace of your business

Today's customers are moving more quickly than ever across an increasingly complex network of systems and applications.

Aurea Messenger lets you integrate technologies you need without getting bogged down in time-consuming custom implementations, or high-risk roll-outs. Aurea Messenger delivers a sophisticated messaging bus that facilitates swift and simple integration of mission critical systems through a series of Aurea-developed or custom adapters.

KEY BENEFITS:

Plug-and-Play ESB: Aurea Messenger delivers a best-in-class Enterprise Service Bus (ESB) for rapid, simple integration and messaging between complex systems.

Multiple Protocol Messaging Support: Aurea Messenger solves the most challenging connectivity problems across SOA, REST, SaaS, and APIs. It's a unified, hybrid integration platform that creates a seamless network of apps, data, and devices with APiLed connectivity.

Enterprise Messaging: Aurea Messenger enables reliable, flexible services for the exchange of critical business data, including connectivity, message transformation and routing, transaction mediation, and process orchestration.

Continuous Availability Architecture: Aurea Messenger's patented high-availability deployment mode includes real-time replication across servers in a cluster, including all messages and transactions to reduce failover to mere seconds without the need for any type of shared storage.

Dynamic Routing Architecture: Aurea Messenger elastically scales and self-balances message routing through dynamic creation of messaging connections between existing or newly added nodes and optimized routing strategies.

Deployment Management: Aurea Messenger Deployment Manager centralizes both configuration and content distribution to the entire message network enabling rapid updates to clusters and elastic addition of new systems.

AUREA MESSENGER FEATURES:

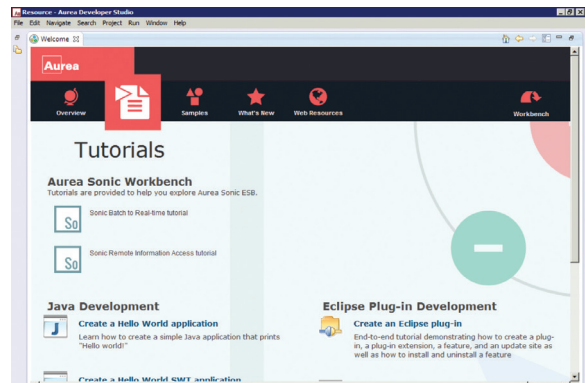

- Let systems adapt flexibly at the pace of your business
- Continuous availability and dynamic routing optimize resources
- Enterprise-class messaging and service-oriented architecture middleware

The New C-Suite: Aurea Integration Solutions

At Aurea, we understand that your infrastructure shouldn't operate in silos. That's why Aurea Messenger is now part of Aurea Integrations Solutions. Aurea Integration Solutions includes our three infrastructure solutions — Aurea Monitor, Aurea Messenger and Aurea Process — which deliver end-to-end capabilities for workflow design, orchestration, execution, and monitoring ripple effects across your processes and underlying systems.

The combined power of Aurea Integration Solutions:

- Delivers all the benefits of Aurea Messenger ESB to integrate complex applications
- Reduces design-build-deploy-optimize time with Aurea Process
- Provides proactive system monitoring and management with Aurea Monitor
